

OPS Bulletin

Passenger Boarding Bridge (PBB) Pre-Position

July 29, 2019

When operating a PBB always be alert and aware of your surroundings as the PBB Operator is responsible for the safe operation of the equipment.

The Pre-Position automatically moves the bridge within approximately five (5) feet of the aircraft cabin door.

Always ensure that the correct aircraft type has been selected. If in doubt, contact a supervisor or manager for assistance.
