

OPS Bulletin

Sort Pier BHS Operations

March 26, 2019

Emergency Stops

Emergency Stops, or “E-Stops”, are for emergency use only. Activating these E-Stops causes baggage to recirculate within the BHS, adding to bag transit times and preventing new bags from being inducted into the system.

“Sort Pier Full” Messages

A “Sort Pier Full” message occurs when the last photoeye of the sort pier is blocked. As with E-Stops, “Sort Pier Full” messages will also cause baggage to recirculate within the BHS, adding to bag transit times and preventing new bags from being inducted into the system. To prevent a “Sort Pier Full” message from registering in the BHS service providers are responsible from removing baggage from the piers in a timely manner, and stacking all empty tubs neatly at the end of each sort pier for collection
